

# Unleashing the Power of Tokenization ‘The Diamond Powered Crypto’

## About KimberLite

Welcome to the future of the global economy. We are currently witnessing a digital transformation as traditional finance and investments undergo a seismic shift towards greater efficiency and accessibility. This revolution is being fuelled by Tokenization of Real World Assets (RWA).

At the forefront of this economic innovation is **KimberLite Token**, the worlds first Web3 ecosystem powered by diamonds and precious commodities.

KimberLite creates **Tangible Non-Fungible Tokens** (TNFTs) that are backed by physical diamonds held in secure storage and brings them to the Blockchain. These virtual digital assets can be exchanged for their real-world diamond equivalent at any time, offering the ultimate in security and investor privacy.

Additionally, with our focus on optimisation and cutting-edge technology, KimberLite is poised to permanently **disrupt** and reshape the diamond industry.

Transparency is key, and with KimberLite Token, every diamond transaction recorded on our platform is public and verifiable online. This eliminates the risk of counterfeit diamonds and ensures a **trustworthy marketplace** for all participants.

Blockchain technology also enables instant validation of buyer funds, making diamond trades **faster** and more **efficient**. No more waiting for payment confirmations or dealing with complex processes. With KimberLite Token, the trading experience is seamless and hassle-free.

KimberLite Token is at the core of our ecosystem. It serves as the medium of exchange for buying and selling diamonds, providing a secure and efficient means of completing transactions. But it is not just about diamonds. Our exclusive currency is also used for in-game purchases and trading TNFTs within our ecosystem.

## Roadmap

Q3 2021

Initial Project Concept  
Initiating Ecosystem Design and White Paper Draft

Q1 2024

Commence UI/UX Design Phase  
Commence UI/UX Design Phase for KimberMarket App

Q2 2024

Tokenization Infrastructure  
Establish Agreement with Tokenization Infrastructure Partners

Q3 2024

First Tokenized eDiamonds  
Tokenization and Sale of the First KimberLite eDiamonds

Q3 2024

Complete Token CEX Listings  
Completing Launch and Listing Plan with Third CEX Live

Q2 2025

Ecosystem Expansion  
Introducing Gold (eGold) and Other Commodities to the Ecosystem

## Ecosystem

### \$KIMBER token

\$KIMBER an all in one token, serving as the backbone of the entire ecosystem, buy, trade and sell precious gems.

### KimberMarket

KimberMarket gives everyone the opportunity to acquire precious commodities directly through the purchase of Tangible-Non-Fungible-Tokens (TNFTs), which are always redeemable for their physical counterpart.

### KimberWallet

KimberWallet provides a secure storage solution alongside ease of use and opens our ecosystem to more participants.

### KimberRush

Introducing KimberRush the next-generation gaming experience where players build their own hyper realistic virtual diamond mine and join the hunt for hidden gemstones.

## Tokenomics

## Leadership Team

Ian Lavender  
Founder / CEO

Paul Hughes  
Co-Founder / CCO

Gabriel Popa  
Co-Founder / CFO

Tom Yeh  
CMO

Sangeetha Rathorn
