Diamonds Are Eternal

Introducing KimberLite Token

KimberLite Token is the world's first cryptocurrency backed by precious commodity assets in the form of Gemstones and AU Metals.

Introduction

Our parent company, BSR Global Group Limited, have been successfully trading commodities for more than 30-years, acting not as brokers but genuine resellers.

While conducting a rough Diamond transaction in 2018 the senior management team became frustrated at the delays caused by conventional banking systems, with up to six (6) working days lost in every deal.

It was agreed that these problems could be completely eliminated through Blockchain technology which would allow instantaneous closure of multi-million-dollar commodity trades.

Utilising crypto-currency as a payment mechanism would reduce the cost of transferring funds while also ensuring smooth execution.

At that time it was felt insufficient awareness of Blockchains capabilities existed to implementation a crypto based solution, however, in recent years this has clearly changed.

Therefore, in 2021 BSR Global decide to invest the time and money required to create KimberLite Token, please watch our short YouTube video for further details;

[Introducing KimberLite Token - The Commodity Crypto](#)

Our team of investment and commodity experts have developed a cutting-edge ecosystem capable of withstanding any potential volatility.

KimberLite Token (KIMBER) is the words first crypto-currency backed by precious commodity assets in the form of Gemstones and AU Metals.

The core use of KimberLite shall be undertaking peer-to-peer payments necessary in precious commodity deals, offering investors unprecedented stability alongside growth potential.

Key Features

Supply & Demand

Price instability will be avoided through balancing token supply with demand. This is where KIMBER is unique to any other crypto currently available.

Our prime case use is buyers and sellers transacting precious commodities. We are able to accurately calculate how many tokens are required monthly to complete deals.

With such information in-hand token supply will be precisely aligned to demand, protecting investors against unpredictable price changes and generating guaranteed profits.

Token Distribution

We have established a 'hard-rule' of never releasing more than 2% of minted tokens per month during the first 18-months.

This will assist in creating demand and our targeted increases in token value, whilst eradicating any potential for participants to 'pump & dump'.

Vesting and Lock

The vast majority of tokens are currently held in vault storage with Unicrypt, with both release dates and vesting periods set to comply with our distribution plan.

Team Tokens are locked for three (3) years with a further 18-month vesting period.

Air Drops and Bounty

Air-Drops and Bounty campaigns shall be used to recognise both long-term partners and early stage investors.

The first Air Drop of 2% (4,000,000 tokens) shall be conducted 6 months after launch (at the end of the Public Offering period) and is designed to reward ICO investors.

It shall be structured such that buyers who purchased KimberLite during the initial phase receive **50% FREE bonus tokens**.

Metaverse Integration

We are establishing a Metaverse depository that allows investors to exchange their KIMBER tokens for both Diamonds and Gold created as Non-Fungible Tokens (NFT's).

These virtual NFT holdings will be backed by equivalent assets within the physical world. Therefore, allowing owners to swap between Metaverse and real world assets with a simple mouse button click.

Token Life-Cycle

Once trades have been completed those tokens utilised for purchase will reside with the producers, having passed from buyer to seller.

We will allow producers to use their tokens for procuring equipment and supplies they need in order to avoid random selling of tokens, which may cause token price fluctuations.

Burn Strategy

Our plan is that buy-back and burn shall be an annual event, whereby 20% of operating profits are employed for obtaining KIMBER Tokens from the secondary market.

This process shall continue until 50% of tokens originally minted have been repurchased and burnt.

Token Symbol	KIMBER
Tokens Minted	200,000,000
Token Generation Event (TGE)	February 27 th 2022
ICO Sale Start Date	February 28 th 2022
ICO End Date	May 8 th 2022
IDO Public Sale Start	May 9 th 2022
Acceptable Currency	BTC, ETH, USDT, BNB, XRP, LTC, SOL, USDC
ICO Sale Duration	70 Days
Total ICO Tokens Sold	8,000,000 (4%)
Smart Contract Number	0x5Cb007F759d897E450D4B15Ac0EAe2001A0b35Ae

Price Points

We are eager to afford early stage investors an opportunity for quick returns. With this in mind there is a 50% uplift between the ICO price of **\$0.10** (ten cents) and Public Offering Price of **\$0.15** (fifteen cents), allowing for profit realisation in as little as 90-days.

However, the financial gains are further enhanced when the Air Drop to ICO buyers, which rewards them with 50% free tokens, is taken into consideration. If we analyse an investment of \$10,000;

Purchased Tokens	100,000 (\$10,000)
Value At Public Offer Stage	\$15,000
50% Free Air Drop (Tokens Valued at \$0.15)	\$7,500 (50,000 Tokens @ \$0.15)
Total Return On Investment	\$22,500

Tokenomics

NOTES:

- 1. The total amount being released into the ecosystem for users and investors to purchase is **52% of minted tokens**.
- 2. We have reserved 6% of minted tokens for Air Drops and Bounty, these shall be released in stages.
- 3. We have reserved 28% of minted tokens for release into the Ecosystem for future investors. These are locked for 18 months and then slowly released based on demand.
- 4. There is 6% of tokens which shall be utilised for establishing Liquidity Pools (LP) on the Decentralised Exchanges selected (Pancake Swap). These shall be released at a rate of 2% per month for 3 months.

Vesting & Lock Schedule

	Percentage	Supply	Token Price	Total Raise (USD)	Lock (Months)	Vesting (Months)	Notes
ICO Stage	4	8,000,000	\$0.10	800,000	0	2	Tokens will be locked until completion of the ICO Phase
IDO Stage	8	16,000,000	\$0.15	2,400,000	2	4	IDO Token release shall be managed to deliver 4,000,000 (2%) per month for 4 months
Liquidity Pool	6	12,000,000			7	3	Locked for 7 months after TGE then released 4,000,000 (2%) per month for 3 months
Marketing	6	12,000,000			10	3	Locked for 10 months after TGE then released 4,000,000 (2%) per month for 3 months
Incentivisation	20	40,000,000			13	18	10% unlocked 13 months after TGE and then 5% monthly there after
Advisors and Partners	9	18,000,000			14	18	10% unlocked 14 months after TGE and then 5% monthly there after
Ecosystem / Future Investors	28	56,000,000			18	18	10% unlocked 18 months after TGE and then 5% monthly there after
Air Drops / Bounty	6	12,000,000			-	-	Released in various stages - 2% will be air dropped to ICO buyers 6 months after TGE
Operational Costs	1	2,000,000			-	-	Operational and Maintenance costs
Team Members	12	24,000,000			36	18	20% unlocked 36 months after TGE and then 5% monthly there after
	100	200,000,000		3,200,000			

NOTES:

- The two key fundamental principals behind our KimberLite ecosystem has always been to create a ‘supply and demand’ atmosphere ensuring stability and eliminating any possibility for a ‘pump and dump’ culture. With this in mind no more than **2% (4,000,000) tokens are released per month during the first 18 months.**
- Team member tokens are locked for three years and then vested for a further 18 months, demonstrating our commitment to project success and longevity.
- Tokens will be released at the end of the month shown and are then available for use within the ecosystem at the start of the subsequent month.
- The Lock and Vesting durations are both based on the Token Generation Event (TGE).
- We have placed tokens into secure vault storage with Unicrypt, which is the most secure method for investors and ensures that locks cannot be bypassed.

The minting process has been completed on Binance Smart Chain and our KimberLite Token can be viewed via BSC Scan;

[0x5Cb007F759d897E450D4B15Ac0EAe2001A0b35Ae](https://bscscan.com/address/0x5Cb007F759d897E450D4B15Ac0EAe2001A0b35Ae)

We are sure that you will agree our team have created a truly unique ecosystem that will not only prove invaluable to the commodities industry, but shall generate stability ensuring promised investor returns.
