

KimberLite
Token

Diamonds Are Eternal Introducing KimberLite Token

A complete crypto ecosystem with physical diamond trading, metaverse play-to-earn gaming and NFT sales portal.

Why Invest In KimberLite?

Our team of experts spent over 3-years developing the KimberLite ecosystem ensuring not only that investor funds are fully protected at all times but that we also offer maximum return on investment via sustained growth.

Proven Experience

Our parent company BSR Global was **established in 1968** and has more than **30-years** of experience in commodities. Their renowned expertise will be the key to our success.

Huge Growth

Contracts are already in place for completing diamond transactions using KIMBER as the payment method, this will then **guarantee massive growth** over the next 12 months.

Token Stability

We have a 'hard-rule' of not releasing more than **2% of minted tokens** per month during the first 18-months, creating demand whilst eliminating any potential for 'pump & dump'.

Liquidity Protection

We have locked a total of 190 million tokens with Unicrypt which are released over the next 5-years with **team tokens locked for 10-years**, safeguarding token liquidity.

Complete Ecosystem

We have built a complete ecosystem with multiple use cases; with **up to \$150 million** of commodity deals traded monthly, Diamond NFT Sales and P2E Gaming revenue.

A Truly Unique Ecosystem That Combines Precious Commodity Trading, NFT Sales and The Ultimate In 'Play-to-Earn' Gaming

KimberLite
Token

KimberLite is the worlds first cryptocurrency designed specifically for buying and selling precious commodities such as Diamonds and Gold.

Our token removes the **frustrating problem of lost time in carrying out trades** as well as **eliminating high banking fees** while creating a common currency that all buyers and sellers accept.

However, we are not just about making financial payments. Our team, has created a complete ecosystem, including a marketplace which offers Gold and Diamonds in Non-Fungible Token (NFT) form as well as a Metaverse 'Play-to-Earn' game which gives players the chance to find real diamonds.

One of the many unique features of our project is KimberMarket, here buyers will be able to purchase NFTs backed by real diamonds held in bank storage. This offers owners the ability to **change between 'virtual' and 'physical' assets** at any time.

When you look at the many ways KimberLite is able to be used, there can be no doubt that this extremely exciting project offers investors amazing potential for profit.

KimberWallet is a custom mobile wallet app designed to be used with KimberLite Token and NFTs purchased from KimberMarket.

When installed the app will automatically be configured to BNB Chain (formerly known as Binance Smart Chain) and have KIMBER token set-up ready to go.

This allows even inexperienced users or crypto newbies to access our platform giving everyone the chance to benefit from this truly remarkable project.

The app is available for both Android and IOS operating systems and offers a simple user interface for sending and receiving tokens.

Mobile App

Create Your Own Virtual Diamond Mine

KimberRush is the next generation great diamond rush offering the ultimate in 'Play-to-Earn' gaming as players build their own diamond mine, where they can discover real hidden gemstones.

The platform we have developed is without doubt the most exciting game to hit the metaverse in 2023 and will allow users to earn some serious profits from their online adventure.

Scattered around KimberRush are diamonds in NFT format which are each valued between **\$10,000** and **\$50,000** these are then backed by physical stones held in secure bank storage.

Miners who discover these magnificent gems can either sell them to investors through KimberMarket or alternatively decide to claim the real diamond held in storage instead.

A Marketplace Dedicated to NFT Diamond Sales

Our **KimberMarket** offers both Diamonds and Gold Bullion in the form of Non-Fungible Tokens (NFTs), produced as 3D images of 'real world' actual stones held in bank storage.

Investors can purchase these highly desirable assets, exclusively with their KimberLite tokens, receiving not only the NFT but a gemmology report and bank storage receipt.

This then allows owners to exchange between 'virtual' and 'physical' assets with a simple mouse button click at any time.

Those who choose to cash-in their NFT will receive in return the real diamond, delivered to their doorstep, without any additional payment.

KimberMarket also handles '**in-game-sales**' for avatar upgrades, tools and equipment that players need for use in KimberRush. They can sell or exchange the NFT' diamonds discovered in their mine.

Experience You Can Trust

Our parent company BSR Global Group consists of world renowned experts in the fields of Construction, Engineering and Commodities.

They originally started trading Crude Oils, which were received as payment in exchange of engineering services provided, approximately **30 years ago**. This lead to the establishment of BSR Global Commodities division.

For the **past 10 years** BSR has focussed on the precious commodities sector, exporting AU Metal and Rough Diamonds from East and West Africa.

Our management team has a wealth of experience in banking, finance, investment and commodities. Technical support and project management is being provided by our parent company, BSR Global Group.

Their team of proven engineers has been completing multi-million-dollar projects for decades. They have a vast amount of project management and technical know-how in successfully implementing software systems.

We have also assembled a team of the best **‘Crypto Advisors’** in the industry steering KimberLite forward and ensuring we reach our true potential.

BNB CHAIN

KimberLite is a BEP-20 token running on BNB Chain (formerly known as Binance Smart Chain) which offers users both low 'gas' fees and exceptionally fast transfers.

BNB Chain can be used for creating (minting) standard tokens as well as Non-Fungible Tokens (NFTs) making it the ideal platform to host the entire KimberLite ecosystem.

Our technical partner Covalent brings unrivalled Blockchain expertise with more than 100 years of cumulative crypto experience.

The Covalent API connects to billions of data points allowing users to pull balances, transaction data and countless other pieces of critical information from dozens of blockchains.

This amazing tool forms the backbone of KimberMarket as well as our KimberWallet. Creating our own NFT Marketplace where users can buy and sell their NFTs exclusively with KimberLite tokens.

Executive Summary

| | |
|------------------------------|--|
| Token Symbol | KIMBER |
| Tokens Minted | 200,000,000 |
| Protocol | BEP-20 |
| Blockchain | BNB Chain (Formerly Binance Smart Chain) |
| Token Generation Event (TGE) | February 27 th 2022 |
| Sale Start Date | February 28 th 2022 |
| Acceptable Currency | BTC, ETH, USDT, BNB, ADA, XRP, LTC, XMR, SOL, BUSD |
| Smart Contract Number | 0x5Cb007F759d897E450D4B15Ac0EAe2001A0b35Ae |

Tokenomics

NOTES:

- 1. The total amount being released into the ecosystem for users and investors to purchase is **52% of minted tokens**.
- 2. We have reserved 6% of minted tokens for Air Drops and Bounty, these shall be released in stages.
- 3. We have reserved 28% of minted tokens for release into the Ecosystem for future investors. These are locked for 18 months and then slowly released based on demand.
- 4. There is 6% of tokens which shall be utilised for establishing Liquidity Pools (LP) on the Decentralised Exchanges selected (Pancake Swap). These shall be released at a rate of 2% per month for 3 months.

Token Life Cycle

Following the completion of transactions for purchasing commodities, tokens shall reside with our diamond miners. In order to avoid them simply 'dumping' KIMBER via exchanges, we assist them in using their tokens to purchase equipment, supplies and humanitarian services for both mine workers and local villagers.

Burn Strategy

We shall use 20% of overall operating profits generated from NFT sales in KimberMarket as well as selling equipment to miners, for annually buying back KimberLite Tokens from the secondary market. This process shall continue until **50% of tokens originally minted** have been repurchased and burnt.

Vesting & Lock Schedule

| | Percentage | Supply | Token Price | Total Raise (USD) | Lock (Months) | Vesting (Months) | Notes |
|------------------------------|------------|-------------|-------------|----------------------|------------------|---------------------|--|
| ICO Stage | 4 | 8,000,000 | \$0.10 | 800,000 | 0 | 2 | Tokens will be locked until completion of the ICO Phase |
| IDO Stage | 8 | 16,000,000 | \$0.15 | 2,400,000 | 2 | 4 | IDO Token release shall be managed to deliver 4,000,000 (2%) per month for 4 months |
| Liquidity Pool | 6 | 12,000,000 | | | 7 | 3 | Locked for 7 months after TGE then released 4,000,000 (2%) per month for 3 months |
| Marketing | 6 | 12,000,000 | | | 10 | 3 | Locked for 10 months after TGE then released 4,000,000 (2%) per month for 3 months |
| Incentivisation | 20 | 40,000,000 | | | 13 | 18 | 10% unlocked 13 months after TGE and then 5% monthly there after |
| Advisors and Partners | 9 | 18,000,000 | | | 14 | 18 | 10% unlocked 14 months after TGE and then 5% monthly there after |
| Ecosystem / Future Investors | 28 | 56,000,000 | | | 18 | 18 | 10% unlocked 18 months after TGE and then 5% monthly there after |
| Air Drops / Bounty | 6 | 12,000,000 | | | - | - | Released in various stages - 2% will be air dropped to ICO buyers 6 months after TGE |
| Operational Costs | 1 | 2,000,000 | | | - | - | Operational and Maintenance costs |
| Team Members | 12 | 24,000,000 | | | 120 | 18 | 20% unlocked 120 months after TGE and then 5% monthly there after |
| | 100 | 200,000,000 | | 3,200,000 | | | |

NOTES:

- 1. Team member tokens are locked for ten years and then vested for a further 18 months, demonstrating our commitment to project success and longevity.
- 2. The Lock and Vesting durations are both based on the Token Generation Event (TGE).
- 3. We have placed tokens into secure vault storage with Unicrypt, which is the most secure method for investors and ensures that locks cannot be bypassed.
- 4. Tokens will be released at the end of the month shown and are then available for use within the ecosystem at the start of the subsequent month.
